EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Dr. Sheng-Guo Wang on Wednesday, January 17, 2007.

The application has been amended as follows:

IN THE CLAIMS:

In Claim 26, line 3, "heating" was changed to - -feeding - -, such that the recitation now reads "feeding a preform at a preform feeding speed into a furnace...".

2. The following is an examiner's statement of reasons for allowance: Regarding claim 21, JP 52-120841, teaches a constant preform feed. Said art does not suggest generating control signals which are based on the combination of preform deviation, fiber diameter deviation, measurement of preform diameter or shape and the predetermined preform value, as claimed, to adjust both the preform feed speed and the fiber drawing speed as indicated by Applicant's disclosed Equation 3. Regarding claim 26, the invention of Harding modified by and Sumimoto utilized two measurement devices but not at the same time. Said art does not suggest measuring at two or more locations with measurement devices generating control signals based on the combination of first and second bar fiber deviations calculated from the bare fiber

diameter measured by the measurement devices. Independent claim 37 is allowed for reasons stated in the previous Office Action mailed on July 26, 2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
